Department of Mathematics & Statistics  
University at Albany, SUNY

July 12, 2022

# Overview

First Section

Second Section

# Outline

First Section

Second Section

# Theorems

## Theorem 1

Euler's formula

$$e^{j\pi} + 1 = 0.$$

## Theorem 2

Mass–energy equivalence

$$E = mc^2$$

# Itemization

- First item
- Second item
- ...

# Algorithm

## Algorithm 1 (Gradient Descent)

- 1: Choose an initial vector of parameters  $w$  and learning rate  $\eta$
- 2: **while** True **do**
- 3:    $w = w - \eta \nabla f(w)$
- 4: **end while**

# Outline

First Section
